## Press Release 3

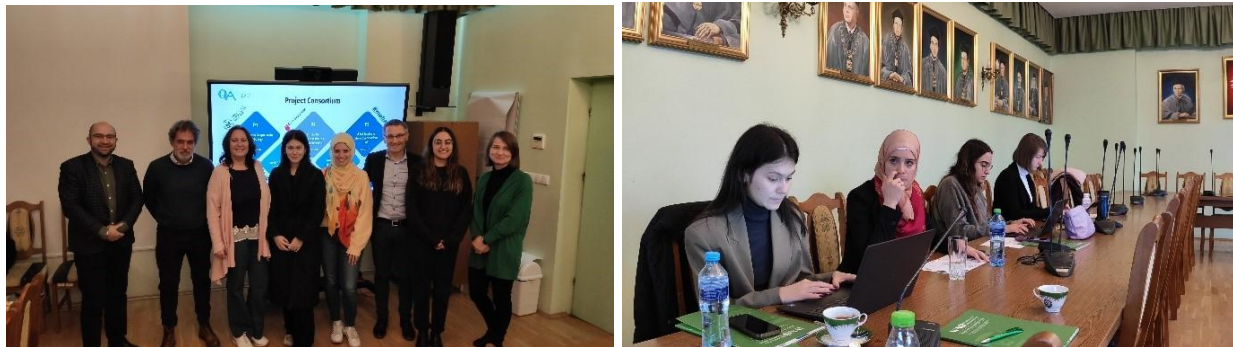

**TPM3: 5-6 December 2024**

**Location: Poland, Warsaw, SGGW**

In the frame of the QA-HEVET project, Warsaw University of Life Sciences (SGGW) hosted our fifth transnational project meeting, which took place in Warsaw on December 5-6, 2024.

Initially, representatives of SGGW welcomed all participants and presented the hosting institution. Then, the current state of the project was discussed to show the state of its actual implementation and the planned activities. Presentations on quality assurance and dissemination complemented the organizational aspect of the discussion. Next, we discussed the results of the PR3 “Quick scan tool for VET Providers and HEIs.” Particular attention was given to reviewing the tool, its testing, and potential improvements. Since the project implementation time is slowly ending, much of the meeting was devoted to organizing the final conference and finalizing the project work. Partners agreed that the meeting was very efficient.

We invite everyone to the final conference where our project achievements will be presented in more detail !!!

## Final online conference: 17 January 2025

The first part of the Final Conference, titled “Aligning of quality assurance systems in HEIs and VETs – conclusions from QA-HEVET Erasmus+ project”, was held online (in English) on 17 January 2025. The purpose of this conference was to present the project's final product, the Quick Scan Tool for VET Providers and HEIs, and to share the insights and outcomes of our work.

The conference joined over 120 participants from various European institutions and was a great success. The project team prepared a series of presentations, giving the project idea, the most important results and application possibilities. This conference was a good opportunity to share the project results more widely and encourage other institutions to use the open and online Quick-scan tool.

**Final onsite conference: 23 January 2025**

**Location: Poland, Warsaw, SGGW**

As a project coordinator, Warsaw University of Life Sciences – SGGW organized an onsite part of the Final Conference titled “Aligning of quality assurance systems in HEIs and VETs – conclusions from QA-HEVET Erasmus+ project.” The stationary conference (in Polish) was attended by over 200 participants from various HEIs and VET providers in Poland.

The participants listened with interest to our project's results, especially the open practical Quick-scan tool, which everyone has access to and can use online. These results aroused considerable interest and willingness to use the online tool. The project can be considered a great success, and we are convinced that in the coming years, the tool developed within the project will serve many entities involved in improving the quality of education.

Projekt dla instytucji szkolnictwa wyższego i kształcenia zawodowego

**KONFERENCJA PODSUMOWUJĄCA**

**23/01/2025**  
**10:00-14:00 CET**  
**SGGW w Warszawie, Budynek 6, Sala D22**

**Dostosowanie systemów zapewniania jakości w instytucjach szkolnictwa wyższego i kształcenia zawodowego – wnioski z projektu QA-HEVET Erasmus+**
